

# Why open digital infrastructure matters

Charles-H. Schulz, Vates SAS

# Open Digital Infrastructure ?

- Hardware + Software
- Centralized or decentralized architectures :
  - Public & private cloud
  - Datacenters
  - On premise
  - Edge
  - IoT

# Software Freedoms...

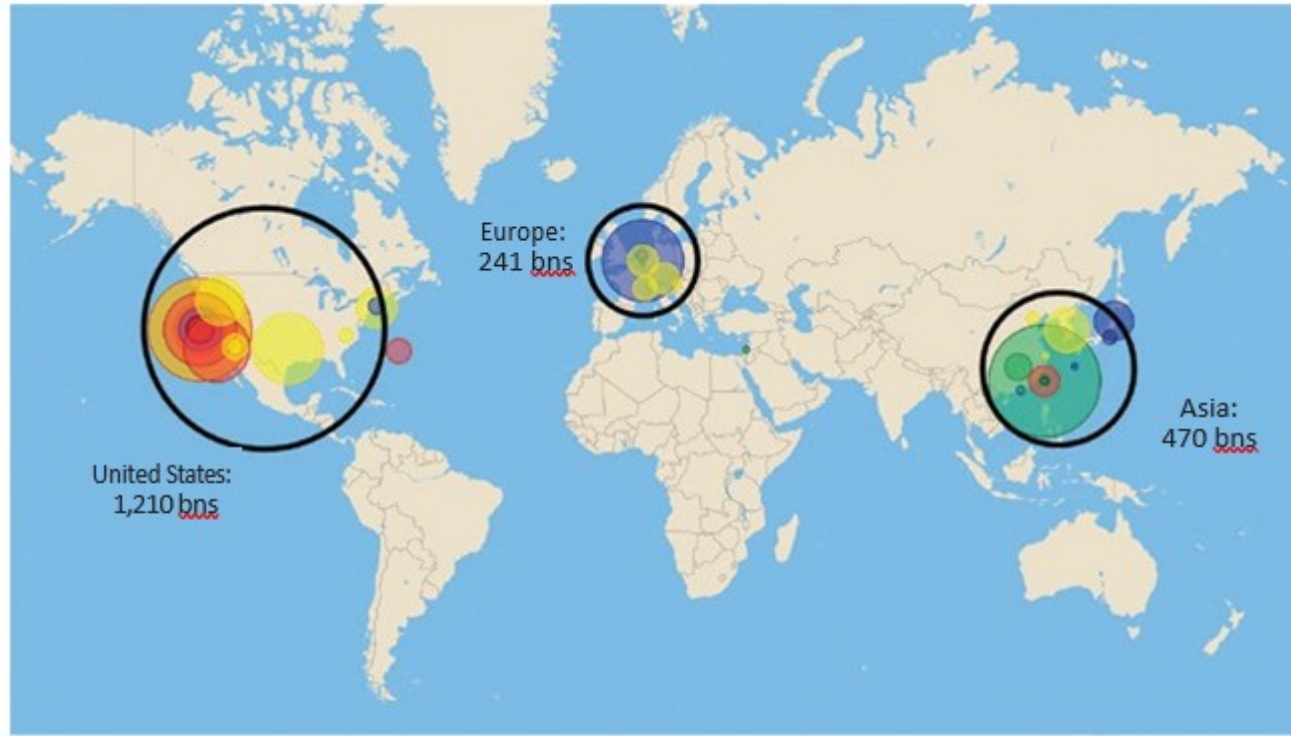

## ... and the printer firmware story

Software has to run on something

Who designs, owns and manufactures  
processors ?

# Hardware openness & economic feasibility

# IP rights & licences & ecosystem

# INNOVATION

# Building an ecosystem

- Public funding, public & private research
- Commonalities & synergies
- Foundries are expensive
- Emergence of new infra players
